A screenshot of a mobile application interface for creating a contact. At the top, there's a status bar with the time 00:16. Below it is a header bar with a close button (X) and the word "CANCELAR", and a checkmark button and the word "OK". The main area has a light gray background. It starts with the label "Teléfono" and an orange person icon. Below that is a text input field labeled "Nombre del grupo". Underneath is another text input field labeled "Escribe el nombre de la persona" with a small person icon to its right. At the bottom, there is a virtual keyboard with a dark gray background and white text. The keyboard includes a cursor icon, a language switch (EN), a microphone icon, a search icon, and a backspace icon. The keys are arranged in a standard QWERTY layout. At the very bottom of the keyboard area, there's a row with "12#", a small "abc" button, a "Touchpal" logo, and a "Siguiente" button.

# Añadir un nuevo contacto

**>Opciones>nuevo>Seleccionar>En la tarjeta SIM o en el teléfono.**

A screenshot of a mobile phone screen showing the 'Añadir un nuevo contacto' (Add new contact) form. At the top, there is a status bar with a battery icon and the time '00:16'. Below it is a header bar with 'CANCELAR' (Cancel) and 'OK' buttons. The form has a 'Teléfono' (Phone) field with an orange person icon. Below that is a 'Nombre' (Name) field with a dropdown arrow and a person icon. Underneath is a section for 'Añadir organización' (Add organization). A blue line separates this from the 'TELÉFONO' (Phone) section. In this section, there are two fields: 'Teléfono' and 'MÓVIL' (Mobile). At the bottom, there is a keyboard with a '12#' key, a 'abc' key, a 'Touchpal' key, and a 'Siguiente' (Next) key.

**Warning:**

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1.0 cm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
